

## *CB-F2 E-Commerce Packing Machine*

Applicable to: E-commerce express packaging, food, hardware, daily necessities, digital electronic products, books and stationery, toys, cosmetics and skin care products, etc.

### **Outstanding Features**

- 4 sets of independent servo motor control (feeding mechanism, packaging film mechanism, servo motor for knife seat mechanism, frequency conversion motor for middle sealing mechanism), motion controller that quickly responds to various commands, precise positioning of products, and precise temperature setting by independent controller.
- 7th generation touch screen: All controls are on one touch screen, user-friendly and easy to operate.
- Box sport knives for high product packaging, ensuring compact packaging.
- Anti-aircraft bag function: start with material, stop without material. Save packaging film, prevent untimely discharge and waste packaging film.
- Anti-cutting function: the cutting material of the knife seat is reversed, the machine stops, to prevent damage to the product, and to protect the knife seat.
- Memory function: It can store 99 sets of packaging parameters (product position, packaging speed, bag length).
- Unlimited product length: independently control the height of the middle sealing mechanism and the knife seat mechanism to meet different product heights.

## Technical Parameters

<b>Film Width</b>	≤450mm
<b>Dimension Of Film Bobbin</b>	Outer diameter≤300mm, Inner diameter≤75mm
<b>Single Knife Bag Size</b>	L:(60-6000)*W:(25-215)*H(10-90)mm
<b>Packing Speed</b>	10-60 bags/min
<b>Weight</b>	960kg
<b>Total Power</b>	AC220V/ 50Hz/ 4.3kw
<b>Motor Configuration</b>	Full servo
<b>Film Bobbin Position</b>	Down
<b>Suitable Package Material:</b>	bubble wrap roll
