

YTJN-100C Liquid Encapsulation Machine

YTJN-100C liquid encapsulation machine capsule filling machine

About the machine

YTJN-100/300/500/700 type liquid series automatic capsule filling machine

1. Adopt Germany originally imported liquid pump, controlled by Japan Yaskawa servo system which ensure the filling deviation and accurate measurement and be controlled within $\pm 1.5\%$.
2. Can fill oily liquid, liquor, suspension liquid or paste, etc in hard capsule.
3. Adopt Stepless Frequency Speef Adjustment, easy and visual to operate.
4. As a new and convenient drug-delivery way and filling idea, this machine is the ideal equipment in the pharmaceutical, food, health care product industry.

Technical parameter

Model	YTJN-100C
Capacity	100 pcs/min
No. of segment bores	2
Machine weight	500kg
Dimension	700*800*1700mm
suitable for filling	oily liquid, liquor, suspension liquid or paste, etc
Power supply	80V, 50HZ
Total power	3kw
Noise	< 80DB (A)
Filling percentage	99.8%
Capsule size	00#-5# gelatin capsule, plant capsule, methylcellulose
Filling variation	$\pm 2\%$
