

## ***Bottom Folding Carton Sealer DZF-5050***

DZF-5050 Semi-automatic machine used for the forming of the bottom of the American type cartons. The former makes it easy and quick to form cardboard boxes, which must simply be inserted into the machine from top to bottom.

The four lower flaps are automatically folded and the box remains locked in place for filling. A pneumatic pusher ejects the box towards a taping machine. When combined with a taping machine, constitutes a compact and productive semi-automatic packaging line.

### **Parameters:**

| <b>Model</b>                     | <b>DZF-5050</b>                                   |
|----------------------------------|---|
| Voltage (V/Hz)                   | AC 220/50 110/60                                  |
| Power (W)                        | 180   |
| Air Compressor (Mpa)             | 0.5~0.6   |
| Speed (m/min)                    | 22 m/min (10 cartons/min)                         |
| Max. Carton Size (L×W×H)(mm)     | 600×500×400                                       |
| Min. Carton Size (L×W×H)(mm)     | 200×160×110                                       |
| Adhesive Tape Materials          | BOPP, PVC adhesive tape, water-free adhesive tape |
| Width of Adhesive Tape (mm)      | 48, 60, 76 (optional)                             |
| External Dimensions (L×W× H)(mm) | 2200×860×1700                                     |
| Net Weight (kg)                  | 280   |
