

CXM-LA2 Semi Auger Powder Filling Machine

Semiautomatic filling packing machine is mainly composed of host, electrical distribution box filling of PLC, touch screen and electronic scale. The filling packing function complete measuring, filling, etc. The machine all stainless steel, corrosion resistance; PLC touch screen man-machine interface, display in both Chinese and English, the operation is convenient intuitive; Conform to and "GMP" certification

Filling adopts

Servo motor drive, mixing with Taiwan maintenance free gear motor, stable performance, high precision packaging; Fully sealed, stainless steel and organic glass container combination, easy unpick and wash.

The workbench convenient lift; Using special screw filling, computer real- time tracking, it has high speed and precision; All kinds of packaging parameters can be stored, can store up to 10 formula; For larger dust material packaging, can be added with dust collection system, clean workshop environment; By changing the screw attachment can adapt to milk powder, monosodium glutamate, solid drink, white sugar, glucose, coffee, pesticide, solid powder, granular additive, dyestuff, veterinary and other packaging

Technical specifications

Filling volume:	10-30b/m
Air compressor capacity:	0.4-0.6MPa
Power supply:	220V single phase 50/60HZ(can be customized)
Filling accuracy:	$\leq \pm 1\%$
