

DC-680/680L High-speed Liquid and Viscous Multi-row (three or four rows) Automatic Packaging Machine for Irregular Shapes

Guangdong Province High-tech Enterprise, Fully Automatic High-speed High-performance Intelligent Packaging Machines Engineering Technology Research Center, specializing in the manufacture of packaging machines. Main products include: pillow packaging machine, fully automatic soft tube sealing machine, multi-row irregular machine, double-sided blister machine, single-sided blister machine, fully automatic lipstick filling equipment, capping machine, multi-row/single-row back sealing machine, fully automatic horizontal packaging machine, multi-row high-speed packaging machine, vertical small bag machine and other packaging equipment.

Product details

- The DC-680(L) can produce 1-4 rows at a time, and the number of rows can be customized according to customer needs. It can make small bag packaging of various special shapes, with arbitrarily designed shapes, and the finished packaging has a particularly beautiful and high-end appearance, and is flat.
- The machine uses international brand electrical accessories and the mechanical structure uses advanced design, making the machine more stable, easy to adjust, and suitable for long-term operation

Technical Parameters

Model	DC-680	DC-680L
Maximum Film Roll Width	600mm	
Packaging Length	Maximum 135mm	Maximum 220mm
Packaging Speed	30-60 bags/row/minute, up to 120-240 bags/minute (4 rows)	
Packaging Volume	1-8ml (Customizable according to needs)
