

WT-series Bowl Conveyor

Bowl conveyor is mainly used for conveying small pieces, granules and other solid materials, such as pork pieces, beef pieces, chicken pieces and other fresh foods and other foods. It is mostly used for packaging machine to lift and add material.

Main Features

1. It can form continuous or intermittent automatic weighing and feeding and packing production line with other supporting equipment.
2. The hopper is made of 304 stainless steel or cast PP, which can be quickly disassembled and easily cleaned.
3. The conveying speed is adjustable with frequency.
4. It can be used with bag packing machine to achieve the packaging of solid night mixture.

Main Specification

Model	WT900	WT1400	WT2000
Hopper volume	0.9 L	1.4 L	2 L
Main Power	1.1 KW	1.1 KW	1.1 KW
Lifting Volume	50hopper/min	50hopper/min	50hopper/min
Power Supply	220V/380V	220V/380V	220V/380V
Feeding Height(can be customized)	1600	1600	1600
Material	PP/304	PP/304	PP/304
Weight	200 kg	200 kg	200 kg

Model	WT3000	WT4000	WT6000
Hopper volume	3 L	4 L	6 L
Main Power	1.1 KW	1.5 KW	1.5 KW
Lifting Volume	50hopper/min	40hopper/min	35hopper/min
Power Supply	220V/380V	220V/380V	220V/380V
Feeding Height(can be customized)	1600	1600	1600
Material	PP/304	PP/304	PP/304
Weight	200 kg	200 kg	200 kg
