

LFF-GFW-09 Automatic Paste Tube Filling And Sealing Machine Plastic Soft Tube Filling Machine

Commonly used in the filling and sealing of aluminum tubes, plastic tubes, and composite tubes in the cosmetics, paste, pharmaceutical, food, adhesive and other industries. It's the ideal equipment in cosmetics, pharmacy, food, and other industry.

Features:

1. Using PLC control, it can fill liquids and high-viscosity liquids.
2. Automatically seal the tail, and can code the production date.
3. Commonly used in the filling and sealing of aluminum tubes, plastic tubes, and composite tubes in the cosmetics, pharmaceutical, food, adhesive and other industries.
4. Machine panel 304 stainless steel material

Specification:

Model	LFF-GFW-09
Application	Metal tube, Composite tube
Tube Diameter	Φ12- Φ30mm
Tube Length	50-220mm (customize)
Filling Volume	5-260ml/pcs (adjustable)
Filling Accuracy	≤±0.5%
Speed	3-120r/min
Production Capacity	50-80 pcs/min
Compressed Air	0.55-0.65mpa
Main Motor Power	1.5kw (380V/220V/50Hz)
Dimension	2200*1100*2300mm
Weight	1400kg
