

JT-120 Semi Automatic Flat Labeling Machine

Semi automatic vacuum suction labeling machine

Characteristic:

1. This device is specifically designed for labeling irregular products and is suitable for various specifications of bottles and lids, with a wide range of applications.
2. Specially customized molds for customers, which are more convenient to use.
3. Foot operated touch switches ensure production safety and smooth operation.
4. Easy to operate, anyone can easily and quickly use this device.
5. Tag synchronization positioning mechanism ensures high tag positioning accuracy up to plus or minus 0.5mm.
6. Process flow: manual bottle placement → labeling → finished product

Technical Specifications:

1. Power supply: AC110/220V 50/60Hz 120W
2. Labeling speed: 25 bottles per minute (depending on placement speed)
3. Labeling accuracy: $\pm 0.2\text{mm}$
4. Product dimensions: length 30-300mm, width 30-150mm, height 50-350mm
5. Label sizes: width 30-120mm, length 30-120mm
6. Label roll diameter: inner diameter of paper roll 76mm, outer diameter (maximum) 360mm
7. Gas source: 5kg/cm²
