

## ***GT6T Automatic 6 Head Paste Bottle Filling Machine***

This complete high-precision automatic piston filling system measures and dispenses to viscous liquid and paste with great speed and accuracy. Equipped with Six inline dispensing nozzles and an infeed conveyor, this machine is ideal for medium to high-volume production settings where speed and consistency are essential. These automated systems are often used by a wide variety of industries to package sauces, juices, oils, nutraceuticals, chemicals, creams, paints, dressings, syrups, and much more

### **Technical Parameters**

|                   |                             |
|-------------------|-----------------------------|
| Voltage:          | 110-220V 50/60Hz            |
| Filling Speed:    | 24-36 B/Min                 |
| Filling Volume:   | 20-5000ml (Optional)        |
| Filling Accuracy: | ±1% (Based on 1000ml water) |
| Filling Head:     | 6                           |
| Machine Size:     | 1850*1150*2160mm            |
| Machine Weight:   | 570KG                       |
