

XGFL series Aluminum Foil Filling and Sealing Machine

This machine introduces the foreign technology, unit filling, aluminum foil cover forming, sealing in one machine. It's widely used for food and pharmaceutical package; especially it's an ideal equipment for various plastic bottle package and seal in milk packages, removing foam and high effective sealing finished products. It reasonably adopts the double-slope cover-punching technology and largely developed the foil usage. It adopts the integral motor design and the first-rate driving, so the running is steady and flat.
