

## *JW-C200 Auto High Precision Check Weigher Machine with Belt Conveyor for Checking Weight*

High Precision Check Weigher is used to check the weight of packed bags and boxes and remove unqualified ones by rejection device.

### Features

1. Grand New modular control system.
2. Fault Alarm by text displaying.
3. Quick Release design.
4. Auto program setting for easy operation.
5. Production records in details.

### Technical Specification

| Model                 | JW-C200                | JW-C200                |
|-----------------------|------------------------|------------------------|
| Identify Code         | C200-2-1               | C200-2-2               |
| Weighing Range        | 5-200g                 | 2-200g                 |
| Accuracy              | XIII(1)                | XIII(1)                |
| Max.Belt Speed        | 80m/min                | 70m/min                |
| Max Speed             | 150PCS                 | 130PCS                 |
| Belt Size(mm)         | 450(L)x100(W)          | 330(L)x100(W)          |
| Control Panel         | 7" Touch Screen        |                        |
| Reject Method         | Air blowing            |                        |
| Power Requirement     | 220V/400W/50/60Hz/2A   | 220V/400W/50/60Hz/2A   |
| Packing Dimension(mm) | 1450(L)x570(W)x1280(H) | 1450(L)x570(W)x1280(H) |
| Gross Weight          | 100kg                  | 100kg                  |
