

DG-006 Manual Tube Filling Machine

As a semi-automatic machine, it is designed for manual feeding of tubes and replenishing of cream and liquid. More importantly, it is of small size, and so is easy to carry.

Features

Versatile Tube Compatibility: Developed by Grand Group, this manual tube-filling machine is capable of filling cylindrical aluminum and composite tubes.

Standard Filling Capacity: Supports a filling range of 5-250 ml, with an output of 80-120 tubes per minute, making it suitable for various production needs.

High-Quality Components: Equipped with Siemens and Omron electronic components, ensuring reliable performance and durability.

Adjustable Filling Rate: Offers flexibility with an adjustable filling rate to meet specific production requirements.

Specifications

Model:	DG-006
Power Supply:	220v,50Hz
Air Pressure:	0.6Mpa
Productivity:	20-25 tubes/min
Filling Volume:	6-60ml/10-120ml/25-250ml
Filling Accuracy:	±1%
Radius of Sealing:	13-50mm
Height of Sealing:	50~210mm
Frequency:	20KHz
Dimension:	L850*736*1550mm
Power:	2600W
Material:	304 Stainless Steel
Weight:	180KG
Application:	Toothpaste,Skincare,Ointment
