

Hot Glue Pre-cut Labeling Machine ZRPP-02 Series

ZRPP-02 Series rotary OPP hot melt glue roll-fed labeler with spray glue has possessed worldwide patent technology of Razorcut. (roll-fed labeling machine with inner cutter drum) Adopting world modern spray glue technology, (Nordson of America) the controllable glue nozzle accurately and directly sprays hot melt glue to the leading and trailing edge of label on the cutter drum and then finish labeling. With advance system of transporting and controlling, applying label is more flat and precision. Since it is simple structure, so it is easy to change containers and labels.

Number of Heads: 6,9,12,15,18,24,30. Design base on the customers' requirement.

Capacity: 3000-32,000 b/h.

Limit Capacity: 110-120%.

Pattern of Container: 50-120mm for cylindrical, square and containers.

Pattern of Label: Max. 220mm.

Label Consumption: <0.5%.

Machine with Conveyor Belt: 1900-4150mm.

Voltage: 380±10%V 50Hz (Special requirement for information)

Air Pressure: 0.6MPa.
