

Cream Paste Filling Machine TAFM01-H

Automatic than herbal balm cosmetic cream hot wax grease filling machine with mixing most commonly applicable for pharmaceuticals, daily chemicals, foodstuffs, cosmetics, pesticides and other industrial. Widely used in daily chemicals, food, beverages, medicine, etc that requires heating and mixing material.

Description

- ◇ The machine adopt weighing measuring, high filling accuracy, and easy to adjust filling quantity
- ◇ The parts contact the material of the machine is made of excellent stainless steel #304. Good appearance, easy to clean and disassemble, in line with GMP standard.
- ◇ With functions of automatic eliminate tare weight. After start-up will accomplish the whole process of filling and capping by automatically, and a high degree of automation.
- ◇ Double speed of fast and slow filling, in case of overflowing, and ensure weighing accuracy
- ◇ Filling is not restrict by the bottle of shape and size, well-adapted.
- ◇ The machine adopts the well-known brand electrical and pneumatic elements, low failure rate, stable and reliable performance, long service life. Components adopt national standardized products, convenient maintenance and repair.
- ◇ Easy to adjust the filling volume and filling speed, the filling head mouth with anti-leakage device, so that ensure there is no wiredrawing and leak through.

Products Parameters

Model:	TAFM01-H
Filling range:	5-60ml / 10-120ml / 50-500ml/100-1000ml (optional)
Filling speed:	20-40bottles/min
Filling accuracy:	$\leq \pm 1\%$
Voltage supply:	220/110V 50/60Hz
Agitation speed:	0-60r/min(Adjustable)
Material:	304&316 stainless steel
Dimension:	3000*850*1800mm
Net weight:	450KG
