

DPB-260/330HL Flat-plate Automatic Blister Packing Machine

Flat-plate Automatic Blister Packing Machine is the new generation of blister packaging equipment, improved on the basis of traditional machine suitable for capsule, tablets, milk slice, candy, the products such as aluminum, shish composite seal packing.

Technical characters:

- Mould exchange: as a tradition 250 type of improved, mould and old type completely general, is old customer renewal of very good choice.
- Die an installation and adjustment: continue lathes type guide rail, use screw adjusting mode of poles, make cabinet protection design clever, can prevent drugs fall into the machine, it is more convenient to clean up.
- Servo traction, set the more convenient, more easily to the cursor, PVC motor feeding, transmission more robust.
- Can be divided structure, convenient transport elevator, gassing axis with PVC, aluminum foil, high-end better use.

Main Technical Parameter:

Punch Frequency	10-70 times/min
Capacity	9600-12000 (standard version 80*57)
Max forming area depth	120x250x26mm
Stroke	20-120, 160mm
Standard blister	80x57mm (can be designed as user's requirements)
Main Motor Power	10Kw
Total Power	380V/220V 50Hz 8Kw
Packing materials	PVC: 0.15-0.5x260mm PTP: 0.02-0.035x260mm
	Cold forming the aluminum film 0.12-0.15x260mm Dialysis paper 50-100gx260mm
	Average hole of roll 70-76mm Packing material maximum width 270mm
Air consumption	≥0.3m ³ /h: 0.6-0.8Mpa
Mould cooling	Tap water or recycle water 60L/H
Overall Dimension	4300x720x1600mm(LxWxH)
Weight	2000kg
