

Double Foil Pharmaceutical Blister Packaging Machines NSL-B

It is suitable for automatic aluminum-aluminum foil heat sealing packing for tablets, candy and pills in medicine, healthcare, chemical, foodstuff etc industry.

Meeting the requirement of sealing for avoiding light, and also it can be used in plastic-plastic heat sealing package. It automatically completes the functions such as vibrating material feeding, broken piece filtering, counting, lengthways and transverse impressing, cutting margin scrap, batch number printing etc. It adopts PLC programmable controller, with frequency converter, man-machine interface to operation, and also can adjust cutting speed and travel range at random. It is accurate feeding, tight sealing, full purpose, stable performance, ease of operation. It can enhance the product grade, extended product durability. It is ideal equipment for pharmaceutical industry.

It has qualified by the national Medicine Inspection of Bureau rank Center, and passed appraisal as the Science and Technology Achievement in Zhejiang Province, and meets GMP standard.

Technical Parameter:

Model	NSL-350-B	NSL-260-B
Production capacity (depending on the shape of the package)	≤2000(tab/min)	≤1400(tab/min)
Punch frequency	40~60times/min	40~80times/min
Compressed Air	0.45Mpa≥0.2m ³ /min	0.45Mpa≥0.2m ³ /min
Width of packings	350mm	260mm
Roll Dia	300mm	300mm
Power	4.0KWS	3.75KWS
Weight	1300kgs	1200kgs
Dimension L×W×H1600×900×1900mm		
Dimension L×W×H1800×1100×2100mm
