

Labeling Machine for Glass Bottles

The labeling machine for glass bottles is suitable for the labeling of various round bottles, such as food, medicine, alcohol, oil, cosmetics and other industries. The whole labeling machine for glass bottles is with exquisite design, remove unnecessary complexity and heavy machinery. Maintenance and repair no need professionals, as long as the simple adjustment.

Features:

1. PLC control system, make the whole machine stable operation and low failure rate. Touch Screen control system, make operation simple, practical and efficient.
2. Labeling transparent label without bubble, labeling adhesive sticker does not wrinkle.
3. Synchronization chain mechanism, to ensure smooth and precise calibration.
4. Machine main body and spare parts all use S304 stainless steel material.
5. The label feeding device can be adjusted in 8 dimensional space, suitable for various round bottles labeling.
6. High precision electric eye positioning, one label or two labels at a time, especially suitable for the back side and front side labeling of round bottles.
7. Date/code printer is for optional.
8. Labeling machine can be connected with conveyor on the production line.

Technical Parameters:

Power supply	AC220V,50HZ,1200W
Labeling capacity	60m/min
Labeling accuracy	±1mm
Lable max. height	205mm
Overall measurement	L2000 W1200 H1500mm
Lable paper core's inn.dia.	Φ76.2mm
Lable ext.dia.	Φ350mm
