

GGs-240(P5) High Quality Plastic Ampoule Filling And Sealing Machine

The machine is suitable for liquid, medicine, beverage, health product, food, perfume, pesticide, cosmetics, electronic cigarette oil, dairy product, fruit pulp, oil and etc.

Introduction:

1. PLC control, frequency conversion regulates the speed.
2. Finish the whole process automatically, including 7 steps in total as putting packing material, forming, filling, printing lot number, punching, creasing and cutting apart.
3. Human-machine interface, operate easily and clearly.
4. No leaking, bubbles or overflowing in filling process.
5. All the related parts connecting with liquid adopt high quality of stainless steel, in accordance with GMP standard.
6. Main pneumatic components and electric appliances are imported.
7. Two kinds of filling system: automatic filling or electric peristaltic pump and mechanical filling, precise calculation with slight error.

Specifications:

Max Forming Depth	12mm
Punch Times	0-25punch/min
Capacity	66000pcs/hour
Filling Nozzles	5 head filling
Packing Material Packaging	PVC/PE PET/PE(0.2-0.4)×240mm
Capacity	1-50ml
Air Consumption	0.6-0.8Mpa
Power	7KW
Voltage	220V 50/60hz one phase
Weight	1200Kg
Outer Size L×W×H(mm)	3200×850×1500 (mm)
