

LC-590 Automatic High-speed Heat Shrink Packaging Machine

The machine is widely used in pharmaceutical, food, cosmetics, stationery, electronic products, daily necessities, toys and other industries body-like packaging, no base care, no cartons, regardless of square, round, flat can be perfect packaging, intuitive effect is very good , Packaging costs low.

Features:

- Monomer or any packaging.
- Anti-cutting safety clutch device, does not damage the packaging.
- Increase the waste recycling device, so that packaging more beautiful, than the traditional packaging machine to save material about 3% -10%.
- Touch screen control system, the operation is extremely simple and beautiful appearance; PLC control makes the system more stable, reliable, low malfunction; bag length, speed and temperature can be individually adjusted, and high accuracy.
- Can be equipped with a printer or inkjet printer, no need human.
- With motor brake control, the device is responsive.
- Heat shrinkable furnace efficient dual temperature zone, efficient hot air circulation, automatic temperature control, to ensure the quality of contraction.

Technical Parameters:

Packing speed (bag/min)	30-135 (bag/min)	
Film type	PVC, POF, OPP, PE and other heat shrinkable film	
Rated power (KW)	3.6(KW)+16.5(KW)	
Power supply (HZ)	Host 220V, 50HZ; shrink machine 380V, 50HZ	
Overall dimensions (MM)	Host 5000 × 965 × 1450mm shrink machine 2400 × 600 × 1750mm	
Total Weight	Host : 1000KG	Shrink machine : 600KG
