

Liquid Filling Machine LF-6PX

LF-6PX Liquid filling machine is a versatility liquid filling machine which is suitable for thin, free flowing liquids as well as liquids with medium viscosity. The design of machine is compact and simple with the high filling accuracy. The filling system adopts the cylindrical piston which is easy to be handled. The main part of filling system is simple to install, adjustment, maintenance and wash with non-tool operation. The machine is widely suitable for many industries and can fill different kinds of liquid, such as pharmaceutical liquid, chemical liquid, cosmetics lotions, shampoos, sauces, syrups, oils, beverages etc.

Key Features:

- Contact parts are made with 316 stainless steel for GMP standard
- 6 filling nozzles driven by high precision cylindrical piston
- Micro-adjustment the flow speed of liquid
- Suitable for a variety of containers
- SERVO Control System which is easy to be controlled
- Operation stable and lower noise
- Easy to connect with the capping machine or other packaging line
- Stainless liquid storage tank (Optional)

Specifications:

Model	LF-6PX
Capacity	30-40 bottle/minute
Filling volume	40-250ml
Filling Accuracy	±1%
Compressed air pressure	87 Psi
Bottle size	Customized based on the requirement
Power	4000w
Voltage	220v, 50-60Hz
Dimensions (L*W*H)	1800mm×1150mm×1850mm
Weight	600kg
