

PLC Touch Screen Multi Heads Flip Bottle Washer Machine

Food filling machine line are wisely use in food packing industry and it is mainly composed of glass bottle cleaning bottle, filling, locking cap and labeling.

Technical Parameter:

1. Number of bottle washing heads: 4-10 nozzles
2. Suitable specifications: according to the sample provided by the customer
3. Washing bottle form: the bottle is inverted, first blowing water and then blowing air
4. Washing speed: about 1000-3000 bottles / hour (the speed will be different depending on the set blowing time)
5. Program control: PLC + touch screen
6. Air pressure: 0.6-0.8MPa
7. Conveyor belt: 82mm wide stainless steel chain belt, speed 0-15 m / min
8. Power: about 2.3KW/AC220V/380V 50/60HZ
9. The washing chamber is sprayed with a fixed nozzle, the pneumatic nozzle is used to blow the water nozzle, and the lower chamber is a water discharge tank. Outside the waste water removal tank, the cleaning chamber is equipped with a plexiglass shield.
10. Washing medium: filter water, use water once, sterile compressed air.
