

Blister Machine DPH190

DPH-190 is a novel and high efficiency AL/PL, AL/AL Blister Packaging Machine, advanced design, perfect structure, all are conform to GMP standard.

- Suitable for plastic thermoforming blister packaging.
- Adopts platen forming, rotary sealing; it is an innovative and efficient Blister Machine.
- Equipped with integrated forming material splicer to enhance efficiency.
- Servo-regulated drive achieves big scale of adjustment in draw off length.

Main Technical Parameters:

Max. Speed :	alu/pvc 150 punches/min.
Max. Output :	300 blisters/min. (alu/pvc blister size 57×80mm)
Max. Forming Area :	175×180mm
Max Forming Depth :	12mm
Material :	Max. width 190mm
Machine Power :	15kw
Machine Dimension :	2830×950×2000mm
Machine Weight :	2000kg
