

Labeling Machines AAM-210 (Top)

This Machine is designed for top labeling on the flat products. It can be incorporated with a line or operated individually.

Features:

- Machine meets current GMP standards.
- Japan PLC combine with Proface human / machine interface LCD touch screen control.
- Japan precision 5-phase stepping motor and driver.
- Stainless steel frame construction is standard.
- Labeling speed is automatically synchronized with conveyor speed to ensure quality labeling.
- Powered wipe-down rollers.
- When the hot foil printer ribbon runs out, this labeler will stop and provide an "error" message.

Options:

- Hot Foil Printer for date-coding.
- LRD-611 a Lion Sensor for transparent labels (USA made).

Specification:

Model	AAM-210
Label Width	A Type/1-12 cm, C Type/1-18 cm
Label Length	1.5-30 cm
Product Thickness (diameter)	2.5-15 cm (bigger size is available on request)
Reel Diameter (Inner/Outer)	7.6 ~ 36 cm (Max.)
Labeling Speed	12-25 Meter per minute
Power Consumption	450W
