

ZHTBW01 Horizontal Round Bottle Labeling Machine

ZHTBW01 horizontal round bottle labeling machine is mainly used for automatic labeling and printing code for bottles with small diameter such as ampoule bottle, vial bottle and oral bottle in pharmaceutical industry.

Features

1. ZHTBW01 horizontal round bottle labeling machine adopts bottle dialing roller to separate the bottles. It only needs to change the bottle dialing roller when bottles are changed. One single machine is suitable for different specifications of bottles.
2. Round bottle labeler adopts roller chain conveyor to ensure accurate and stable labeling.
3. Intuitive and user friendly touch screen makes operation more convenient.
4. ZHTBW01 horizontal round bottle labeling machine has the functions of intelligent label control, error warning and unique bottle breaking prevention technology.
5. All the electrical components are from world famous brands which ensure stable and reliable performance of round bottle labeler.
6. Coder and ink-jet printer are optional to realize information printing while labeling.

Parameters

Model	SL-1201
Labeling Speed	200-300 bottle/min. (Varies with the different sizes of substrates or label)
Labeling Accuracy	0.5 mm (Excluding the error of substrate and label)
Bottle Diameter	0-22 mm or 18-30 mm
Power and Power Supply	AC220V/5%/50Hz/1200W
Dimensions	1800 mm (L) × 700 mm (W) × 1500 mm (H)
