

TLC-200 Multi-functional Cartoning Machine

TLC-200 multi-functional cartoning machine is suitable to cartoning various boxes used to packing candies, cookies, medical appliance, and hardware, etc. It can stably put the products into the box and sealed the box. It is also suitable to cartoning of all types of medicine, food, cosmetics, and small equipments in relevant industries. By the meanwhile, it is suitable for different size products package, you can change from one size to another if you need to. It is convenient to change from one product to another, because the mould can be supplied quickly and installed conveniently. It not only can meet single production, also can meet small capacity various products production.

TLC-200 multi-functional cartoning machine is our company's new invention. It can realize carton transfer, automatic carton open, product transfer, product assembly, automatic product feeding, carton edge folding, carton close and carton seal. It has advantage of small size, low weight, can be wide applied, high production capacity, etc. It is very convenient to change from one product to another. Compared with manual feeding, it saved a lot of time and space. At the main while, it can connect with the following machine to form production line, such as pillow packing machine, weighting machine or cellophane paper (film) box-type tridimensional packing machine, in this way, it can meet the automatic package requirement and meet GMP requirement.

Main technical parameters:

Power	380V, 3 Phase, 5Lines,50Hz、 Main Power: 3.5kw
Production Capacity	15 box/min (Note: Depends on the size and quantity of packed products)
Air Consumption	20M ³ /h (Pressure: 0.5-0.7Mpa)
Overall Dimension	3800×1200×1560mm (L×W×H)
Weight	About 1.8 T
Carton Size	Max.: 200×200×65mm Min.: 85×80×25mm
Noise	Less than 85 dB
