

XGS30(12/20) *Bottle washing machine*

Main usage:

This production line is suitable for 50ml, 100ml, 250ml and 500ml glass I.V solution glass bottle washing, filling, plugging, etc.

Performance & characteristics:

1. make washing, filling and capping in integration can greatly decrease the prophase investment and anaphase service fee.
2. ultrasonic cleaning can avoid causing dead angle and breakage bottleneck with fur brush washing.
3. water is reclaimed using at a lower rank, its pressure and time can set according to real demand, whereby decline the consumption of water
4. unique water tightness structure can make the rough and fine washing zone in totally disconnected.
5. for high autoimmunization level and photoelectric detection it can realize "no bottle, no filling and no capping".

Main technical parameter:

capacity	100-300b/min
quantity of bottle-entering per time	30(12.20)bottle
gross powder	3-9 kw, 380v 50hz
specitification	50, 100, 250, 500ml
lon water consumption	~80 ml/bottle
distilled water consumption	~100ml/bottle
GIP/SZP	125°C~30min
noise	max 75db
compressed air	0.4-0.8mpa 4m3/h
body material	304
point of adherence with liquid medicine	3161 or special silicon tube
