

## Automatic Liquid Packing Machine GF1802

### Description:

1. This machine is suitable for all kinds of gas free liquid, specially for the soy source, vinegar, juice, juice beverage, self-doing beverage, soy milk, milk, mineral water and other liquid bag package.
2. It is mainly composed of frame, mechanic drive system, film feeding system, traction mechanism, film cleaning and sterilization device, ultraviolet radiation device, heat sealing and cutting device, and canning device.
3. It is made of stainless steel which accords with food production requirements. Each working process is finished accurately by PLC control center of Panasonic by using touch screen with computerized program as per the design requirement.
4. The whole machine is equipped with automatic rectifying device for film deviation, film length counting adjustment device, multiple channel sterilization process, mechanic drive, and hence no pump required. It is featured by low noise.
5. With imported electric appliances, it features high canning precision, sanitary and firm sealing, and simple and reliable operation, and hence an optimal equipment for bagged water production.

### Technical Standard:

Model	GF1802
Packing method	Automatic forming for packing
Voltage	380V/220V/50HZ
Power	3.2kw
Production Capacity	500-600BPH
Suitable bag volume	5L-10L adjustable bag shape
Film Width	760mm
End product width	360mm
Filling Range	≤12.5kg
Weight	1200KG
Overall Dimension (LxWxH)	2160X1500X1030mm
