

Automatic Pouch Packing Machines VT-25-CF

Industries and factories manufacture products for sale in the market that need to be packed in pouches. The automatic pouch packing machines make this task easy by sealing, closing and packing the pouches at a very fast speed. It can be used for packing shampoo, oil, mineral water and liquid products. The machines also find use in food industries for packing of pouches containing paste, jam, sauce, pickle and many other foods. Vista techno pack machines provide automatic pouch making machines for industries and businesses that need to make pouches and packets of products for sale. The sealing and packing speed of the machine is very quick and a large number of pouches can be packed at once in a minute. The pouches are sealed from three or four sides. Also, the machine can make a center seal. Sealing is done with the help of heat. The pouch film is made of poly laminate.

Product Details:

Capacity (pouch per hour)	3000-4000
Pouch Capacity	10-1000
Pouch Length	8
Machine Power	1-2 HP
Condition	New
Driven Type	Electric
Filing Type	Weight Filler
