

SKN Eye Drop Filling Machine

Brief Introduction:

This machine is mainly available to fill eye drop various round plastic or glass bottles with the range from 5~15ml. High precision cam provides scale position-set to position and cap. Accelerated cam makes capping heads go up and down. Constant retortion force caps, creep age pump measures filling volume, and touching-screen controls all action. No bottle no filling and no capping. If there is no plug in the bottle, it must not cap until detecting plugs in the bottle. The machine enjoys high position accuracy, stable driving, dosage, simple operation and also protects bottle cap etc.

Main Technical Specifications:

Output	40~70 bottles/min
Power	1kw
Power supply	380V/50Hz
Air source	5m ³ /h; 0.6~0.8kg/cm ²
Overall size	1200*9600*1400
Filling precision	≤+2%
Eligibility	≥98%
Weight	600kg
