

## *Y100B Automatic Liquid Sachet Sealing Plunger Pump Packing Machine*

Y100B Automatic Liquid Sachet Sealing Plunger Pump Packing Machine is specially designed for liquid, paste material auto-weighing filling and bag forming sealing. Widely applied in the market of water, hot pot, food additives, this machine unit has been accepted by customers for a long time.

### **Features:**

The bag making series adopts stepper motor subdivision technology, the bag making accuracy is high, the error is less than 1 millimeters, the two way controlled thermal sealing mechanism, the temperature control is more precise, the sealing quality is higher, the packing material is Small.

When the door is opened, the light point is not correct packing material is exhausted and overloaded, in order to ensure the stable operation of the machine, the equipment has an automatic alarm function.
