

DZ-500/2S Double Chamber Vacuum Packing Machine

The double chambers vacuum packaging machine is built for meat, sauce, flavoring, dry fruits, bean products, solid particle packaging. The vacuum packaging can prevent the products from corrupting and wet to prolong the shelf life.

Features:

- The whole machine is constructed of 304 stainless steel. The working area is easy to clean and corrosion resisted.
- The vacuum and package sealing is finished automatically. Parameter of sealing and vacuum can be adjusted accurately.
- This machine has full function for vacuum sealing and suitable for various kind of products.

Double Chambers Vacuum Packing:

The double chambers vacuum packaging machine is ideal equipment for packing meat products, seafood, medicine, electronic components, hardware, and medical instruments etc.

Technical Data:

Machine Model	DZ-500/2S
Voultage	380V / 50Hz
Power	2.3KW
Weight	220kg
Sealing Length	500mm×2
Sealing Width	10mm
Dimensions	1250×760×950mm
Maximun Vacuum	≤-0.1MPa
Chamber	500×420×95mm
