

Pillow Type Sliced Cheese Packaging Machine LG-280

Pillow type sliced cheese packaging machine is a professional packaging equipment. It is widely used in bread, hamburger, moon cakes, pastries, egg yolk pie, Portuguese egg tart, cookies, caramel treats and other baked goods.

Our company's product cheese slice packaging machine in absorbing foreign advanced technology and rich experience in the birth of the high-speed automatic packing machine, this technology has reached international advanced level of the packaging machine. This cheese slice packaging machine has the remarkable characteristics of fast packaging speed, low scrap rate, labor saving and high efficiency.

Features

1. The main control circuit of cheese slice packaging machine adopts the slicing equipment developed by our company. All data can be displayed by touch screen and controlled by the inverter system. The perfect visual automatic system makes the operation more concentrated and convenient.
2. Cheese packaging machine is a automatic packaging machine, the length and width of the bag are automatic detection of equipment and setting, the operation more convenient, reduce the influence of artificial factors on the machine.
3. The dual-frequency converter is adopted to simplify the mechanical structure system, with little vibration, little wear, long service life and easy maintenance.
4. Cheese slice packaging machine adopts a dual-frequency converter system, which can control both the packaging speed and the packaging bag length. The machine is equipped with stepless speed and width adjustment range, which can make the machine match the original working procedure.
5. Independent temperature control system is adopted for each sealing part of cheese packaging machine, making it more widely used and applicable to all kinds of flexible packaging materials.

6. The built-in highly sensitive electric eyes of the machine can automatically, accurately and sensitively track objects, making the packaging more suitable and beautiful.
7. During the use of sliced cheese packaging machine, the intermittent inflating device and alcohol spraying device can be installed on the machine, which can make the product safer.

Technical Data:

Model	LG-280
Width Of Packing Film	Max.280mm
Length Of Bags	90- or 150-330mm
Width Of Bag	50-140mm
Product Height	Max.40mm
Film Roll Diameter	Max.280mm
Packaging Speed	50-250bag/min
Voltage Specification	220V/50HZ
Power Source Specification	2.5kw
Machine Dimensions	(L)4000×(W)950×(H)1450mm
Machine Weight	650Kg
