

## *Glass Jar Sealing Machine*

This glass bottle vacuum capping machine is widely used in industries, such as food industry: soy sauce, vinegar, juice beverage, sesame paste, chili sauce, peanut butter, canned honey peach, canned carambola, etc.

This machine has the function of vacuum pumping. The product after the sealing of the screw cap can effectively extend the warranty period under normal environment, and it is not easy for the product to be oxidized and deteriorated with the outside air.

The vacuum capping machine is generally referred to as the equipment for the vacuum capping of glass bottle tinfoil. The top of glass bottle has a screw, and the cover is usually made of tinfoil.

It has the same number of buttons as the corresponding number of screw threads. According to different bottle mouth diameter standards, it has three, four and six screw caps.

### **Technical Parameters:**

Voltage	380 v / 220 v + 10%
Power	400 w or less
Applicable bottle type	$\varphi=40-90$ mm
	H=50 -180 mm
Host power	0.55KW
