

Granular Food Bag Packing Equipment XH-20BK

Model XH-20BK is a Rotary measuring cup packing machine for particle food in the market.

This machine adopts screw feeding technology, which can effectively avoid material blockage in the feeding process, and the hopper is made of food-grade stainless steel, which meets the safety and health standards of enterprises.

Not only that, the spiral measuring cup is used in the measuring mode of materials, which is suitable for measuring easy-to-flow particles and powder products with poor fluidity.

In addition, this small bag solid particle packaging machine is also equipped with a servo motor to reduce noise in the packaging process and long service life. At the same time, it is also equipped with an intelligent control system to control the packaging operation parameters of the whole machine, so it is not difficult to operate.

In short, this is a reliable machine that allows users to get a quick ROI

Technique Performance

Model	XH-20BK
Packing speed	40-60 bags/min
Range of measurement	3-15ml
Bag size	(L)50-75mm (W)55-75mm
Power	1.6KW
Driven Type	Pneumatic
Total power	220V/50HZ
Packing material	Paper/the polyethylene,nylon/polyethylene,tea filter paper,etc
Net weight	300kg
Overall dimensions	(L)640*(W)750 *(H)1850mm
