

## *DXGF6-6-1 Small Automatic Beer Filling Machine*

### **Product Description:**

Machine instruction: 6 Heads Washing, 6 Heads Filling, 1 Heads Capping.

Machine filling processing: washing bottle --- CO2 into bottle --- Vacuum --- CO2 --- Vacuum --- Filling Beer --- Capping

1. This series of Automatic Glass Bottle Beer Filling Machine can meet the filling-sealing requirements of different sealing manners for crown cap.
2. The Automatic Glass Bottle Beer Filling Machine adopts the advanced international technology. The design is scientific and reasonable, appearance is beautiful, operation and maintenance are convenient, and it is with high degree of automatic. It is the good machine for choosing by the drinking filling factory.
3. This Automatic Glass Bottle Beer Filling Machine is quite easy to be operated and maintained with the adopting of PLC control of frequency conversion Timing. All the parts of Beer Bottling Line contact with liquid are made up of high quality stainless steel, both exterior and interior of the machine are polished for easily cleaning and good hygiene condition. The sealing parts are all imported from foreign countries, which meets the requirement of the hygiene of the food safety.
4. Rotatory bottle-rinsing machine has the functions of not opening the valve and rinsing without bottle, which is working from bottle entrance, bottle transportation, bottle clipping, bottle turning around with synchronously rinsing inside of the bottle to water-dropping and exit have the functions of not opening the valve and rinsing without bottles.
5. Adopting the way of filling by holding the necks of the bottle, plus the function of pre-cover of the centralizing cover with high precise centralization, which ensure the right seating of mouth of the bottle and filling valve, with low liquid loss.
6. Adopting crowning the caps with magnetic force, which passes the torque with powerful and constant magnet, and the torque can be adjusted to meet the need of many kind of plastic cap

7. The advanced CIP series can clean and sterilize all the containers and insides of all pipes before and after the operation.

**Technical Parameters:**

1. Model DXGF6-6-1
2. Capacity: 500-600BPH (330ml)
3. Suitable: Glass bottle 270ml, 330ml,
4. Cap type: Crown Cap
5. Machine include function: washing filling capping
6. Machine Size: 1600x1200x2200mm
7. Machine Power: 3.5KW
8. Machine weight: 3200kg
9. Machine electric brand: SIEMENS, MITSUBISHI
