

## *SYD semi-automatic ampoule inspection machine*

YD semi-automatic lamp Inspection Machine is the second artificial light to achieve further development of the invention of semi-automatic control in mechatronic servo motor. Inspection light is moving from the half-plane transmission reverse integration, through the organic visual black and white double-sided magnifying glass, the unqualified Automatic tick bottles of mechanization drive.

### **Technical Parameters:**

Model	YD
Range	Ampoule
Light Inspection Method	Eyes
Packing Bottle Method	Automatic
Production Capacity	50-100 bottles/min
Power	220V,50Hz, 2.2 Kw
Packing Size	1200x700x1200 mm
Packing Weight	300 Kg
