

Automatic 2 Head Filling Machine With Conveyer – CE-1000L/GCGA-2C

2 Head filling machines is a CE series of Automatic Piston filler developed by our company to a high concentration of fluid filling the filling machine, filling volume and filling speed can be adjusted, filling accuracy high, filling valve adopts anti-leakage, anti-pull and lift the filling device. The device has a simple structure is reasonable, easy to understand, and high accuracy features. It can be converted into a long, explosion-proof type, overflow filling system according to customer demand.

Technical Parameter:

Model	CE-1000/GCGA-2C
Brand	FULLWELL
Type	2 Nozzle
Power	220v 50Hz
Air pressure	0.5-0.7Mpa
Power	300w
Filling range	100-1000ml
Filling speed	20-60 bottles/min
Filling accuracy	± 0.5%
