

## *Automatic Quantitative Filling Machine For Tea*

Automatic quantitative filling machine for tea is a new type of heat-sealed, multifunctional automatic teabag beverage packaging equipment. The main feature of the machine is that the inner and outer bags are formed at one time, which avoids direct contact between human hands and materials and improves efficiency. The inner bag is filter cotton paper, which can be automatically taped and labeled, and the outer bag is composite paper.

### **Scope of application:**

- Packing speed: 30-60 bags/min
- Filling range: 1-15g (depending on product)
- Film width: 280mm
- Bag size Inner bag: width 40-80mm; length 50-70mm
- Outer bag: width 50-90mm, length 70-120mm
- Label size: width 40-55mm; length 20-24mm
- Thread length: 155mm
- Power supply: 1 phase 220V, 3.7kw, 50/60Hz
- Machine size: 1000\*900\*2000 (mm)
- Machine weight: 500KG
