

HBC-5000 Granule Weighing and Filling Machine

Feature:

1. Consists of feeding components, working, engine body and electric control parts.
2. Can weight and fill granule products, electronic sensor control weighing feedback, no limit for packing container, suitable for varieties of materials and packaging specifications which frequently change.
3. High precision, high speed and long lifespan. Controlled by PLC, color touch screen display, easy to operate, can save 10 sets of data at most.
4. Electronic sensor control weighing feedback. The whole machine is 304ss except the electronic control and drive part.

Specification:

Model	HBC-5000
Filling Weight	50-1000g
Packaging Accuracy	$\leq \pm 1-2g$
Packing Speed	8-15bag/min
Machine Weight	200KG
Machine Size	L780×W800×H1800mm
Power	Single phase, 220V, 50/60Hz, 0.5KW
Operation Interface	PLC color touch screen man-machine interface
Type of Measuring	two vibration feeding and the electronic sensor weighing feedback
