

XH-35SG Automatic Ring-pull Cans Sealing Machine

Automatic ring-pull cans sealing machine is suitable for the sealing of various tin cans, tin cans, aluminum cans, paper cans and other round specifications. It is easy to operate and is an ideal sealing machine for food, beverage, pharmaceutical, chemical and other industries.

Machine Features:

1. Unmanned operation, automatic under cover and seal, according to the rising trend of artificial price level, the device will become a mainstream model;
2. The can body of the canning process is not rotated, so that the product and the can body are protected well. The processing precision is high, and the sealing quality is better than that of similar domestic products.
3. The machine's production efficiency is 2 to 3 times the semi-automatic sealing machine, and due to the use of automatic under cover and sealing device, saving labor costs at the same time, improve the production efficiency;

Technical Parameters:

- Model: XH-35SG
- Sealing speed: 30-35 cans/min.
- Sealing height: 50-200mm adjustable
- Applicable bottle diameter: 35~100mm (only one caliber)
