

NT-50T Automatic Bag Maize Corn Wheat Flour Packaging Machine

This machine designed for such materials as powder and fine powder, this machine can finish metering, filling and sealing automatically. It is also used to meter and fill powder, making a product line with several kinds of packing machine.

Features:

1. High precision, high speed, long life, good stability, artificial bagging, automatic measurement.
2. It is not limited by the packaging container and is suitable for the occasions where the material variety and packaging specification often change
3. It is designed for vibration feeding and electronic platform weighing, and it overcomes the shortcoming of measurement error caused by the change of material specific gravity
4. The touch screen display is simple and intuitive, the packaging specification can be adjusted continuously, the working status changes arbitrarily, and the operation is very simple

Specification:

Model	NT-50T
Voltage	220V/380V
Capacity	300-600 bags/h
Packing range	5-50kg
Packing speed	2-4 bags/min
Power	900w
Size	1700*700*2300mm
Weight	260kg
Material	304 stainless steel
