

NY-865 Automatic Unscrew and Rotate Cover Machine

Suitable for unscrew and rotate covers of various round bottle, square bottle, flat round bottle. It also used by rack-type lonely. The production can meet the needs of large-scale production line.

Application:

The machine is widely used for full-automatic screwing cap in foods & beverage, spice, medicine, chemicals, industries and so on.

Features:

1. The machine is combined with automatic cap arranging, covering and screwing, features fast speed, high efficiency, reliable and stable running.
2. Photosensor and approximate switch and other elements are using international famous brand, to make sure that the cap unscrew machine can control automatic no caps the switch is on, full caps the switch is off.
3. The bottle shape what the machine can apply is round shape, square shape, oval shape and special-shaped and so on.
4. Doesn't require to replace parts for filling different shapes of bottles with easy adjustment, strong adaptability.
5. The electric parts and pneumatic parts are used world-renowned brands, the advantage is low failure rate, reliable performance and long service life.

Technical Parameters:

Applicable Bottle Height: 80~150mm;

Applicable Cap Diameter: Φ 50~100mm;

Applicable Bottle Diameter: 40~100mm;

Production Capacity: 30~35 bottles/min.(Depend on products size)

Cap Uploading Method: By Manual

Conveyor Height: 900+50mm(can customize as requested.)

Power Supply: AC 220V/50HZ; 1450W ;

Air Pressure: 0.5~0.8Mpa;

Dimension: 3000mm*1100mm*2050mm(L*W*H);

Weight: about 500kg.
