

GZJ80 Tube Filling Machine

GZJ80 Tube Filling Machine is widely used in toothpaste, cosmetics, pharmaceutical cream category, food, shoe polish and viscose and other industries, for aluminum, plastic hose packaging products, filling, sealing and printing batch number. Automatic loading of toothpaste tube, automatic alignment, and automatic toothpaste tube fully automated to reduce labor costs and improve production efficiency. No tube, no filling, safe and reliable. Hot air heating, hot air from the tube wall heating, do not destroy the surface of the hose, the tail of the beautiful.

Specifications:

Type	GZJ80
Capacity(pcs/min)	80
Power(kW)	2.0
Tube Diameter(mm)	15-40
Tube Length(mm)	80-200
Dosing Volume(ml)	1.5-200
Compressed air(MPa)	0.6
Weight(kg)	1800
Dimension(mm)	2400x1200x2400
