

Cap Elevator SG-1

The cap elevator goes with our capping machines in our bottling production line to convey caps to the cap container. The speed of conveying can be adjusted. Inside are sensors which detect when the supply is low. When empty, the sensors stop operation.

Main performance parameters:

- Production Capacity: ≤ 10000 piece/hour
- Cap Specifications: $\Phi 12-50\text{mm}$; Height: 15-40mm
- Power Source: $\sim 220\text{V}$, 50HZ
- Power: 120W
