

Vertical Self-Adhesive Round Bottle Labeling Machine STL-100

Brief Introduction:

Vertical Self-Adhesive Labeling Machine is mostly applicable for the wrap-around labeling of round cylindrical containers for medicine, commodity, foodstuff, cultural supplies, and electronics etc industries.

Features:

1. Adopts stepping servo motor, PLC control system, color touch screen display.
2. Adopt Japan photo Sensor to detect and check the length of labels Automatically
3. Equipped with warning device of insufficient labels, broken labels and no chromatapes.
4. Accurate label position, fast speed and high labeling precision.
5. Automatic detection, No container no labeling,.
6. Machine body is made by stainless steel, completely meets GMP requirements
7. It can install with coding/inkjet printer (optional).

Parameter:

Model	STL-100
Speed	30~80 pcs/minute
Suitable label roll inner diamet size	Φ75mm
Suitable label roll outside diamet size	Φ350mm maximum
Drive	Step motor driven
Label Size	width : 15~120mm length : 15~300mm
Power	0.5KW
Coding Device	Ribbon Coder
Voltage	AC 220V ; 50Hz
Weight	350KG
Dimension	2000×800×1300mm
