

XGJ6 type six rotary capping machines

Purpose and brief

This machine is suitable for the large diameter of the rotating cap sealing lid, planetary type structure, six head cover; screw bottle, good synchronization; lifting type of cover body, small noise; pneumatic catching cover screwing structure, stable performance, and the lid appearance will not damage. This machine is convenient maintenance, strong adaptability, can realize one machine with multiple.

Main technique parameters

Production capacity: 5000 ~ 6000 bottles / hour
Application lid: diameter not larger than diameter of 100mm
(Three capping and four capping etc.)
Capping rate: 99.5%
Power source: 220V 50Hz
Power rate: 2Kw
Dimensions: 2300 x 920 x 2100
