

YB-1 Liquid Packing Machine

The package machine is suitable for filling soy sauce, vinegar, juice, milk and other liquids, using 0.08 mm polyethylene film, automatic to complete the molding bag, quantitative filling, ink printing, sealing and cutting off process, and film using UV disinfection before packaged, in line with the requirements of food hygiene.

Features:

- All parts of this automatic liquid packaging machine are made of stainless steel.
- Adopting self-priming pump quantities filling, direct heating sealing and cut off.
- The adjustment of bag size, packaging weight and cut temperature is convenient and reliable.
- Production date ribbon print, and at the letters, dorsal closure, electro-optical Tracking.

Technical Parameters:

Production efficiency	2000 bags / hour
Packaging quality of	100-500g / bag
Filling accuracy	± 1.5% / bag
Films sizes	Thickness: 0.08 mm, width: 320 mm (240mm)
Power	220 V/380V 50Hz
Weight	350kg
Size	1057 × 750 × 1850mm
