

Three Servo High Speed Automatic Pillow Packing Machine HTL-A1200

- This model is a horizontal packaging machine used for packaging candy and other foods with specifications. The technology adopted makes the packaging speed very fast;
- Full automatic computer touch screen control and servo motor device system can easily and quickly adjust the packaging of various sizes;
- Multi District temperature control device, which can be set freely on the touch screen, packaging and high-quality sealing to ensure the product quality of packaging materials;
- Equipped with high-speed automatic film connection function, high efficiency ratio;
- Automatic display and alarm of mechanical failure is convenient for operation, maintenance and repair.

Technical Parameters:

| Model | HTL-1200a |
|------------------------|------------------|
| Packing Som | 1300p |
| Candy dimension Length | 10-30mm |
| Wadth | 10-30mm |
| Thickness | 15-20mm |
| Packing flim | BOPP&CPP, PET&PE |
| Voltage | 380V |
| Total power | 5.5kw |
| Net weight | 1100kg |
| Dimension(L xWxH) | 2876*1378*1764 |
