

Used for the filling and semi plug of antibiotics, bottle cooling powder needle or water needle. Adopts mechanical mold to positioning, tracking filling, has the characteristics of simple and convenient replacement of specifications, can after nitrogen can complete bottle, bottle, filling, capping process.

Features:

- The machine adopts the mechanical mould to tighten the positioning and track the filling.
- Easy to change the specifications.

Technical Parameters:

Bottles applicability	2-100ml
Outout	120-300 Bottle/min
Power source	220V 50HZ
Filling nozzle	08.дек
Power	2.0KW
Weight	1500KG
Size	2510 x 880 x 1350mm
