DXH Series Automatic Cartoning Machine

Cartoning machine is a type of packaging machine used to package products into cartons or boxes for transportation and storage.

Suitable for automatic packaging of items, such as Alu, PVC, blisters, bottle shapes, ointmelhts, etc.

Some of the key advantages include:

● Product Protection
Cartons provide a sturdy and protective packaging solution that safeguards the products from damage during transportation and storage.
● Branding and Marketing
Cartons offer ample space for branding, product information, and marketing messages helping to create brand awareness and attract customers.
● Efficient Packaging
These machines can handle high volumes of products and package them at a consistent speed, reducing manual labor and minimizing errors.
● Convenience for Consumers
They are easy to open, reseal able if necessary, and typically provide clear instructions for product use.

Technical parameters

Model		DXH-130	DXH-220
Cartoning Speed		40-100 boxes/min	140~180 boxes/min
Box	Quality Requirement	250~350g/㎡ (according to the dimensions to confirm)	250~350g/㎡ (according to the dimensions to confirm)
	Dimension Range	(70-180)mm×(30-85)mm×(14-50)mm	(70-200)mm×(50-120)mm×(14-70)mm
	(L×W×H)		
Leaflet	Quality Requirement	60-70 g/㎡	60-70 g/㎡
	Unfolded Leaflet Specification	(80-250)㎜×(90-170)mm	(80-260)*(90-190)mm
	(L×W)		
	Fold Range	1-4 Fold	1-4 Fold
	(L×W)		
Compressed Air	Working Pressure	≥0.6mpa	≥0.6mpa
	Air Consumption	120-160L/min	120-160L/min
Power Supply		380V/220V 50HZ	380V/220V 50HZ
Total Power		0.75kw	5kw
Machine Dimension（L×W×H）		3100mm×1100mm×1550mm(around)	4035mm×1460mm×1730mm (around)
Machine Weight		About 1400kg	About 3000kg
